

Any height, any load: we have the right selection

Pallet Trucks

Hand pallet truck **AM 2200** travel distance: short capacity: 2200 kg
 Electric pedestrian fork lift truck **EIE 116-120** travel distance: short max. capacity: 2000 kg
 Electric pedestrian fork lift truck **EIE C20** travel distance: short capacity: 2000 kg
 Electric pedestrian fork lift truck **EIE 220-230** travel distance: short max. capacity: 3000 kg
 Electric pedestrian fork lift truck with operator stand-on platform **ERE 120** travel distance: medium capacity: 2000 kg
 Electric pedestrian fork lift truck with operator stand-on platform **ERE 224** travel distance: medium capacity: 2400 kg
 Electric stand-on/leaf fork lift truck **ESE 120** travel distance: medium/long capacity: 2000 kg
 Electric sideway seat fork lift truck **ESE 200-530** travel distance: long max. capacity: 3000 kg

Support Arm Stackers

Electric pedestrian stacker **EMC 110** max. lift height: 2000 mm capacity: 1000 kg
 Electric pedestrian stacker **EIC 110-112** max. lift height: 3600 mm capacity: 1200 kg
 Electric pedestrian stacker **EIC 212-220** max. lift height: 5350 mm max. capacity: 2000 kg
 Electric pedestrian stacker with operator stand-on platform **ESC 212-216** max. lift height: 5350 mm max. capacity: 1600 kg
 Electric sideway seat stacker **ESE 213-216** max. lift height: 5350 mm max. capacity: 1600 kg
 Electric pedestrian lift truck / stacker for double-deck loading **EEO 220** max. lift height: 2500mm capacity: 2000 kg

Counterbalance trucks

Electric 3-wheel counterbalance truck with rear wheel drive **EFG 110-115** max. lift height: 6500 mm max. capacity: 1500 kg
 Electric 3-wheel counterbalance truck with front wheel drive **EFG 213-220** max. lift height: 6500 mm max. capacity: 2000 kg
 Electric 4-wheel counterbalance truck **EFG 316-320** max. lift height: 6500 mm max. capacity: 2000 kg
 Electric 4-wheel 3-phase AC counterbalance truck **EFG 425-430, EFG 535-550** max. lift height: 7000 mm max. capacity: 5000 kg
 Electric 4-wheel counterbalance truck with rotating cab **EFG D30** max. lift height: 7000 mm max. capacity: 3000 kg
 Diesel / LPG stacker **DFG/TFG 316-550s** hydrostatic max. lift height: 7000 mm max. capacity: 5000 kg
 Diesel / LPG stacker **DFG/TFG 316-550** hydrodynamic max. lift height: 7000 mm max. capacity: 3500 kg
 Diesel / LPG stacker **DFG/TFG 660-690** max. lift height: 6600 mm max. capacity: 9000 kg

Reach Trucks

Reach truck Range 1 **ETV 110/112/114/116** max. lift height: 8420 mm max. capacity: 1600 kg
 Reach truck Range 2 **ETM/ETV 214/216** max. lift height: 10250 mm max. capacity: 1600 kg
 Reach truck Range 3 **ETV 320/325** max. lift height: 12020 mm max. capacity: 2500 kg
 Reach truck Range C **ETV C16/C20** max. lift height: 7400 mm max. capacity: 2000 kg
 Multi-way Reach Truck Range Q **ETV Q20/Q25** max. lift height: 9620 mm max. capacity: 2500 kg
 Range 1 to 3 can also be fitted with cold store cabs

Order Pickers

Horizontal order picker **ECE 118** max. picking height: 1st level capacity: 1800 kg
 Horizontal order picker **ECE 220** max. picking height: 2nd level capacity: 2000 kg
 Vertical order picker **EKS 110** max. picking height: 4600 mm capacity: 1000 kg
 Vertical order picker **EKS 310** max. picking height: 10390 mm capacity: 1000 kg
 Several truck variations ensuring solutions for every application (example: ECE 220 with raising stand-on platform)
 Extensive additional equipment provides tailor-made solutions to individual requirements (example: EKS 310 with walk-on load section)

Tow Tractors

Tow Tractor **EZS 130** tractive power 3000 kg
 Tow Tractor **EKS 513-515** tractive power 3000/5000 kg
 Due to a great number of coupling types and trailers, Jungheinrich tow tractors are suited to a wide range of applications.

High Rack Stackers

Order picker/tri-lateral stacker **EKX 410** max. lift height: 7750 mm max. capacity: 1000 kg
 Order picker/tri-lateral stacker **EKX 513-515** max. lift height: 14250 mm max. capacity: 1500 kg
 Tri-lateral stacker **EX 410-413** max. lift height: 7000 mm max. capacity: 1250 kg
 Tri-lateral stacker **EKX 513-515** max. lift height: 13000 mm max. capacity: 1500 kg
 Several degrees of automation provide solutions for every type of warehouse operation (example: ETX 515 for fully automatic application)

Throughput	from the floor	ETG	electric counterbalance truck with counterbalance truck
	over ramps	EA 2200	electric pedestrian fork lift truck
Transporting	short distance	EA 2200	electric pedestrian fork lift truck
	medium distance	EIE	electric pedestrian fork lift truck
Storage/Stacking	lift height to 550 mm	EMC	electric pedestrian stacker
	lift height to 7000 mm	EFG	electric counterbalance truck
Order Picking	lifting height to 1420 mm	ETM/ETV	electric counterbalance truck with front wheel drive
	lifting height to 1030 mm	EKS	vertical order picker
	Towing capacity to 3000 kg	ETV C	electric counterbalance truck
	Towing capacity to 5000 kg	EZS 330/350	electric counterbalance truck

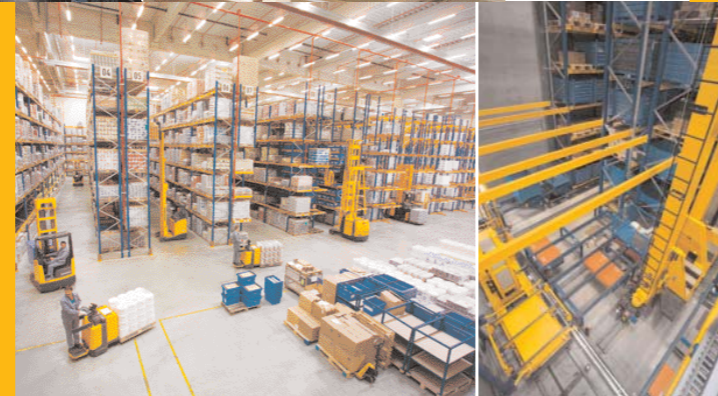

Jungheinrich provides you with the right pallet truck, order picker or tow tractor for every application. However, first you should check our standard range (overview on the right) with regards to your requirements. For instance, if you have to transport goods over short distances - without having to deposit them on racking - 600 truck variations there is a solution for you. You will find under the headings "Transport" and "Short distance" the "hand" and "the electric pedestrian pallet truck AM 2200" and then we will build a truck to your exact requirements.

Cost effective and reliable

Industrial trucks for stacking, storing and order picking

Jungheinrich help to make a safe and reliable internal logistics system. With industrial trucks, racking and order pickers, you can rely on us to solve your internal logistics problems.

Industrial trucks, racking and logistics systems

Complete solutions for complete internal logistics

More than just metal: Jungheinrich racking systems

For perfect teamwork: stacker and racking from one supplier

Racking is far more than just metal, it is the key to maximising productivity – as the specific warehouse design will ultimately maximise material flow.

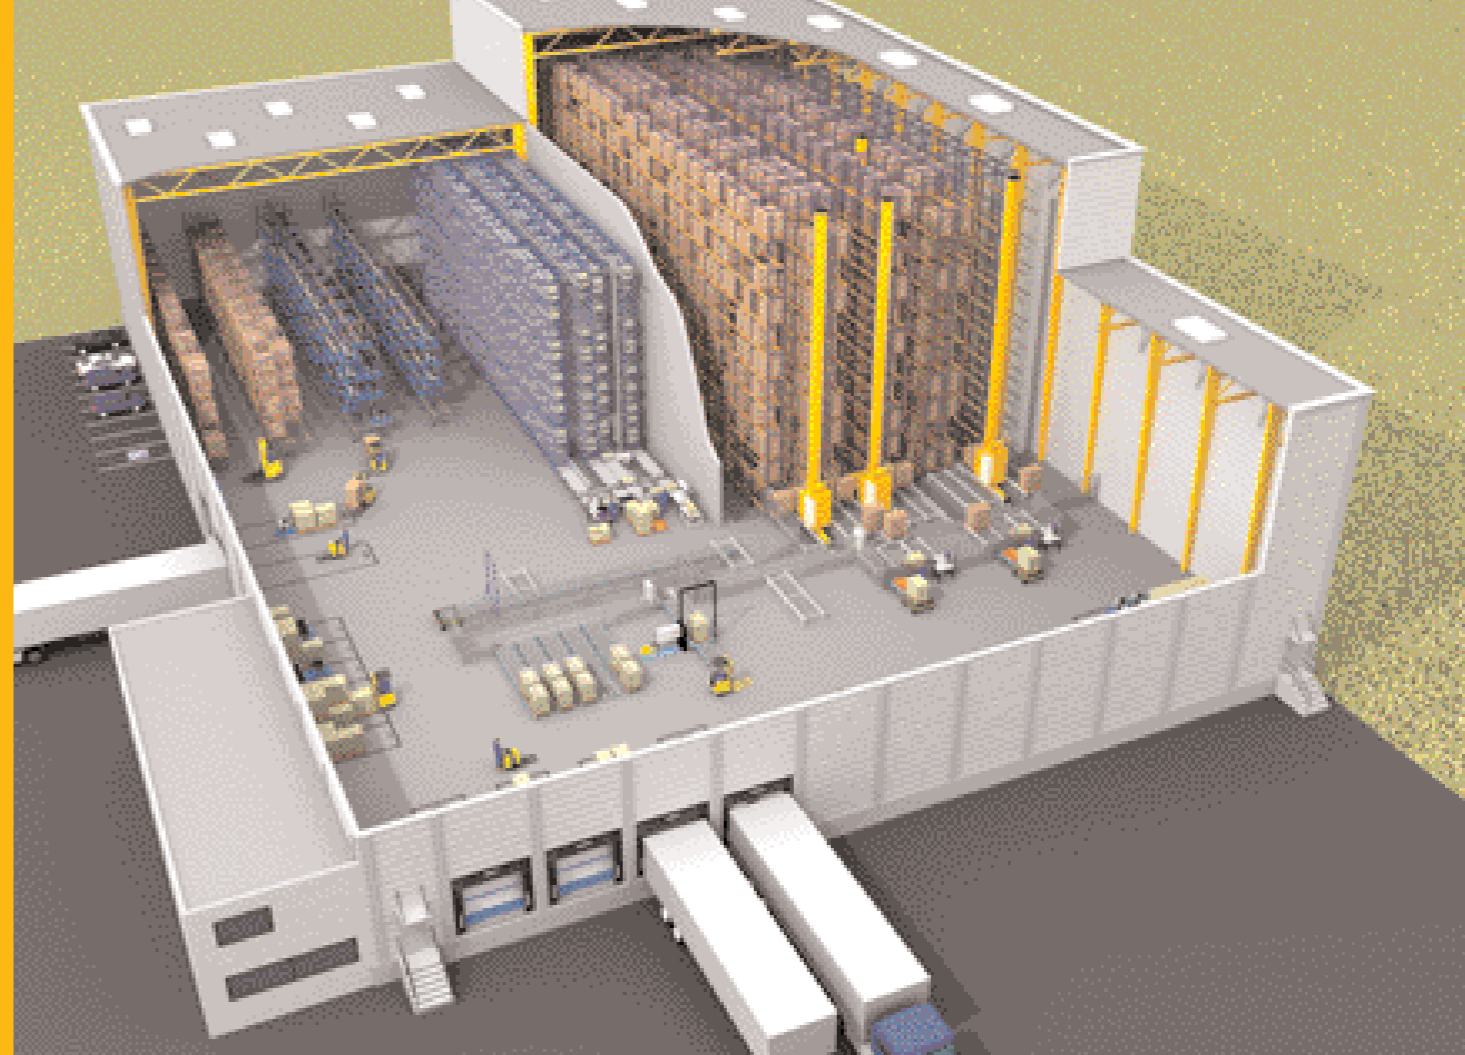

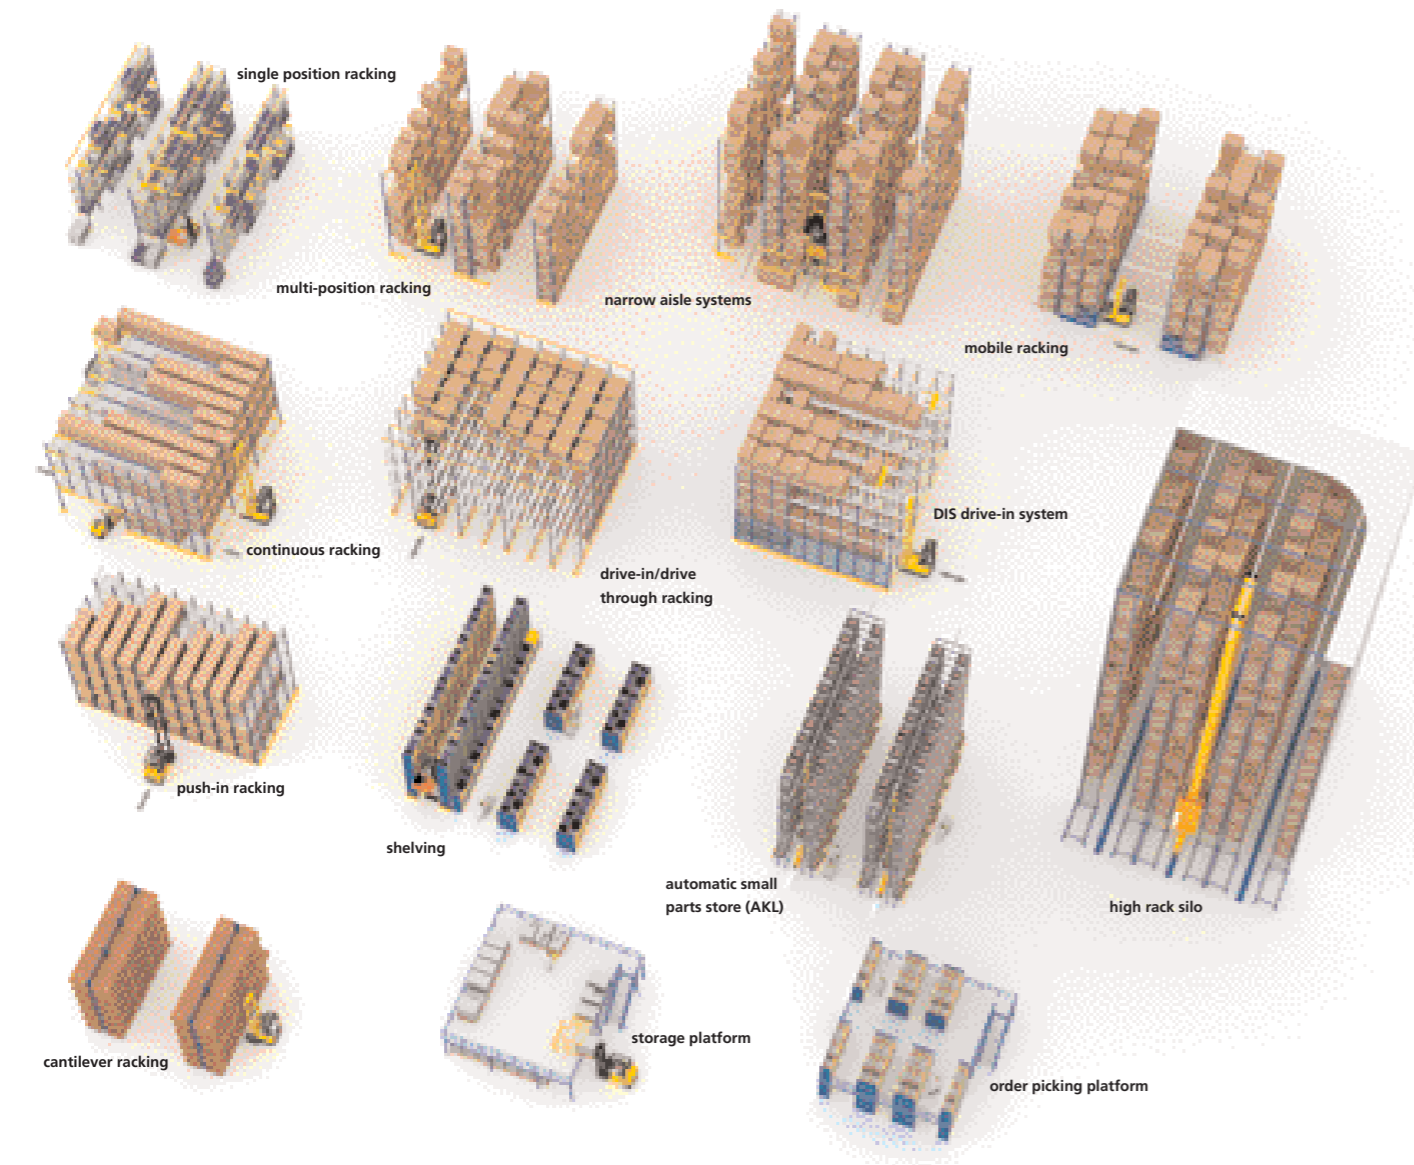

Jungheinrich offers you this key: racking systems, mezzanines and clad racked buildings. For the storage of pallets, containers and racks. For cartons or long loads. Jungheinrich provides you with the complete solution here, complete warehouse planning that sees racking, industrial trucks/rack servicing cranes as one system working hand in hand. From inception through project planning to handover. From consultation via tailor-made financing to one of the most extensive customer service networks in Europe.

Experience makes perfect

As one of the leading industrial truck manufacturers, Jungheinrich is aware of the demands made on racking. When developing a Jungheinrich racking system, our depth of experience with planning, project managing and commissioning many thousands of warehouses worldwide are drawn on.

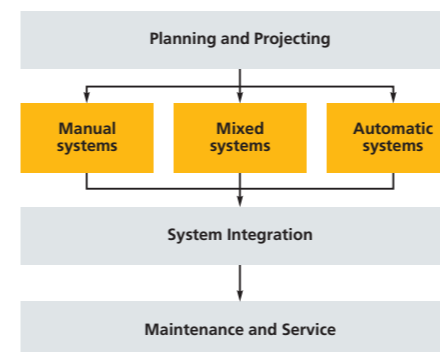

Excellent consultation

Jungheinrich specialists know the demands that have to be met so that trucks and racking are perfectly integrated. Whether working cycles are carried out with pedestrian pallet trucks, counterbalance, reach trucks, high rack stackers, stacker cranes or order pickers, Jungheinrich provides you with a complete truck and racking solution package.

Complete logistics systems from one supplier

Cost effectiveness from goods-in to goods-out

Logistics solutions for your warehouse from one supplier

- Warehouse projects on a "green field" site and expansion of existing warehouses
- Manual, semi or fully automatic
- Equipped with warehouse management system/ radio data communication
- Optimised processes due to synchronized material and information flow

Jungheinrich does the planning and project management

- With high levels of practical and relevant experience
- Based on an analysis of your material and information flow
- With the main objective to find and utilise unused potential
- Taking into account the future expansion of your company

Jungheinrich guarantees system integration

- Responsible for the total system as main contractor
- Coordination and installation of your entire materials handling equipment fleet
- Professional project management
- Regular communication with the client

Jungheinrich offers you a complete Aftersales programme

- Long term utilisation and investment security for your warehouse
- Over 3000 own service engineers throughout Europe
- Every service engineer is a mechanic, electrical and hydraulics expert in one
- Hotline support or remote maintenance/on site action
